

Graduation and Computer Engineering Design Projects

- Until Monday, October 30, each group must define their project title and must be approved by the project advisor. Those who have not approved their project title until this date will not be able to attend midterm presentations. After this date the subject, group and advisor change is strictly prohibited.
- A project may be assigned to more than one project group.
- Each project will be presented by a student to the design project/graduation project board of the computer engineering department. Each project will be evaluated and graded by the board cooperatively.
- The projects will be presented twice in the semester. Your midterm grading will be based on your first presentation, and your final grading will be based on your second representation.
